RESIDENTIAL PROJECT

# Terrazzo at Home

Bespoke Stone Seal Terrazzo | Dublin

# Stone Seal Terrazzo

Stone Seal Terrazzo brings colour and character underfoot without grout lines or joints. Each floor is mixed to order, with base colour, aggregate and finish chosen together, then poured, ground and polished in situ to run seamlessly through kitchens, living spaces and stairs.

# Bindery House

Commercial Project: Dublin | Scarpa Inspired Terrazzo By Stone Seal

**PROJECT**
Bindery House, Dublin
1960s office retrofit
Grade A workspace
LEED Platinum
Fossil-fuel-free

**STONE SEAL SCOPE**
Scarpa inspired terrazzo floor
Feature stairs
Clay plastered walls
Bespoke fixings

**LOOK AND STYLE**
Marble pieces set in a pale terrazzo ground
Denser at the entrance
Sweeping curved treads

# A sustainable finish for a Dublin landmark

Working with Henry J Lyons, Stone Seal's team delivered the reception floor, stairs and wall finishes for Bindery House, the retrofit of a well-known 1960s office building in the centre of Dublin. The building targets LEED Platinum and runs without fossil fuels.

The Scarpa inspired terrazzo that defines the lobby is a grid of approximately 3,000 marble pieces, each set out and spaced so the terrazzo could flow between them. The pieces gather at the entrance and ease out towards the walls, giving the reception a floor to match the new ribbed granite entrance outside.

The curved stair treads were measured on site, cast off-site as precast panels, then brought in and fitted in place. With the plastered walls and fixings also completed by Stone Seal allowing the floor, stairs and wall to read as one continuous piece of work.

This particular overlay range carries an official Environmental Product Declaration (EPD), ensuring verified low carbon impact during its manufacturing and processing. It was a project built on close collaboration with the design team and a client ready to rethink what a retrofit can achieve.

Bespoke Stone Seal Trowel | RKD Architects

# Stone Seal Trowel

Stone Seal Trowel brings the quiet character of polished concrete into a space without the need for a new slab. Hand-trowelled in situ at around 10mm over new or existing floors, it runs seamlessly from kitchen to office space, with soft tonal movement and a colour chosen to suit the setting.
